

### DETAILS

#### **Project**

Advanced Blending Solutions  
Wallace, Michigan

#### **Area**

Total 23,000 sq.ft.

#### **Site**

Size of site = 1.94 Acres

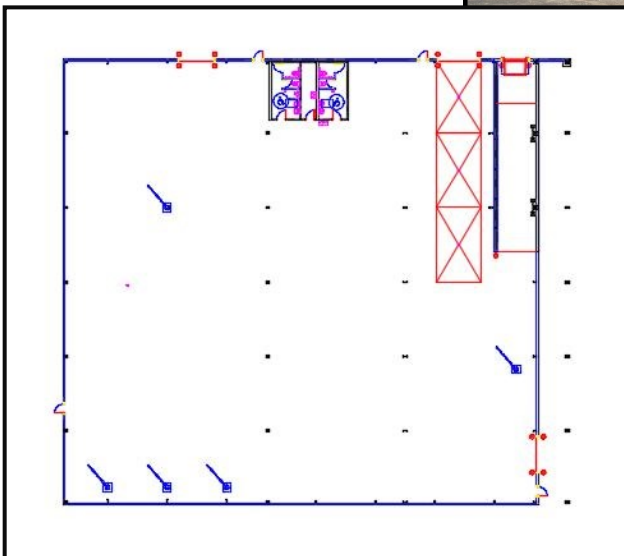

### NEW BUILDING - 2013

This industrial building was designed around the re-use and relocation of an existing 10,500 sq. ft. pre-engineered steel framed building. The new pre-engineered steel framed portions of the building were designed to work integrally with the existing structure.

The project included complete building design services, including architectural, civil, structural, mechanical, electrical and plumbing design.
