St. Anthony of Padua  
Wells, Michigan

### **Area**

Main Level	2,450 sq. ft.
Lower Level	1,600 sq. ft.
Total	4,050 sq. ft.

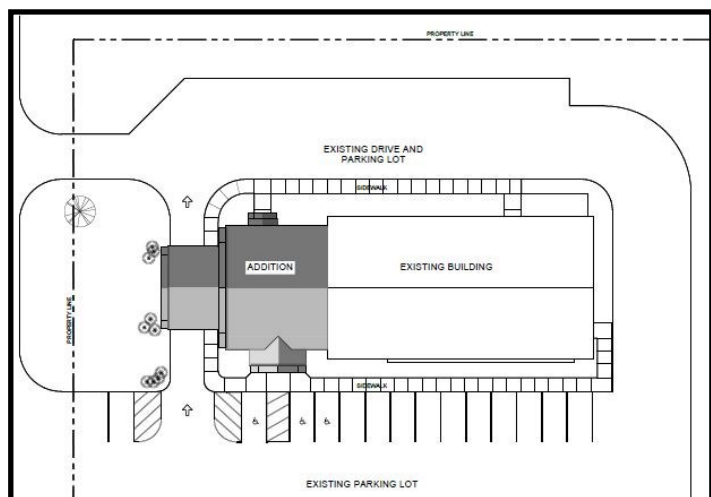

## **BUILDING ADDITION AND RENOVATIONS - PROPOSED**

A proposed new addition designed for the needs of the Parish. The addition includes covered entrance canopies, a large gathering space, an accessible restroom, classrooms, storage rooms and an accessible lift. The proposed design also includes renovations to the existing Fellowship Hall, Sanctuary and restrooms.

Currently, the Parish is pursuing a capital campaign and the project is scheduled for 2016. To assist with their fund raising efforts, presentation boards were prepared for displaying in their existing church facility. This includes conceptual floor plans, site plan, elevations and colored 3D renderings.
